

PROJECT PROPOSAL

TRANSPORTATION KPI DASHBOARD

A Business Intelligence & Analytics Dashboard for Fleet, Revenue and Operational Performance Tracking (Advanced Excel).

Prepared for: Transportation Logistics

Prepared by: Wahab Sodiq Olamide.

Date: August 2026

Version: 1.0

TRANSPORTATION KPI DASHBOARD

GOAL:

To know how efficiently the transportation business is operating and where management can improve performance.

BUSINESS SCENARIO:

Company X daily operation, as they operate buses across different routes. Management wants to know:

- ✓ Which routes generate the most revenue?
- ✓ The best performing driver?
- ✓ Which Vehicles are underutilized?
- ✓ The routes with the most delay?
- ✓ Amount of fuel consumed?
- ✓ The occupancy rate?
- ✓ The most profitable branches?

USER TARGET:

1. Operations Manager:

- ✓ Trips completed.
- ✓ Delayed trips.
- ✓ Active Vehicles.
- ✓ Fuel usage.

2. Finance Manager:

- ✓ Revenue.
- ✓ Operating cost.
- ✓ Profit.
- ✓ Cost per trip.

3. Branch Manager:

- ✓ Driver performance.
- ✓ Route performance.
- ✓ Passenger volume.

DASHBOARD FILTERS:

The core determinants of the dashboard are:

- | | | |
|---------|----------------|----------|
| ✓ Year | ✓ Branch | ✓ Driver |
| ✓ Month | ✓ Route | |
| ✓ Day | ✓ Vehicle Type | |

KPI CARDS:

There will be 8 KPI cards for the dashboard design

- | | | |
|-----------------|--------------|------------|
| ✓ Total revenue | ✓ Average | ✓ On-time |
| ✓ Total trips | occupancy | percentage |
| ✓ Number of | ✓ Fuel cost | |
| passengers | ✓ Net profit | |
| transported. | ✓ Delay rate | |

CHARTS:

There will be 9 charts in the dashboard that display:

- ✓ Line Chart: Revenue Trend per month.
- ✓ Column Chart: Trips per month.
- ✓ Horizontal Bar Chart: Top 10 routes by revenue.
- ✓ Area Chart: Passenger volume across months.
- ✓ Ranking: Top 10 drivers based on Revenue, Trips & On-Time Percentage.
- ✓ Vehicle Utilization: Shows vehicle, vehicle trip, vehicle distance, fuel consumed and revenue i.e there will be a dropdown in the Vehicle Utilization to select vehicle and the details displayed.
- ✓ Pie Chart: Analysis for delay (Traffic, Mechanical failure, Weather or Driver).
- ✓ Column Chart: Branch performance to describe the best performing branches.

DATASET:

The following dataset will be used for my data heading:

- | | | |
|----------------|------------------|--------------------|
| ✓ Date | ✓ Trip id | ✓ Operating cost |
| ✓ Branch | ✓ Departure time | ✓ Ticket revenue |
| ✓ Route | ✓ Arrival time | ✓ Passenger count |
| ✓ Vehicle id | ✓ Delay (minute) | ✓ Vehicle capacity |
| ✓ Vehicle type | ✓ Distance (km) | ✓ Occupancy rat |
| ✓ Driver name | ✓ Fuel cost | |

DEVELOPMENT PLAN:

Phase 1:

- ✓ Business understanding.
- ✓ Dataset review
- ✓ KPI definition

Phase 2:

- ✓ Data cleaning
- ✓ Master tables
- ✓ Helper table

Phase 3:

- ✓ Evaluation sheet
- ✓ Calculations

Phase 4:

- ✓ Dashboard design

Phase 5:

- ✓ Charts
- ✓ Interactivity
- ✓ Executive insights

BUSINESS INSIGHT:

- ✓ Best performing route.
- ✓ Highest revenue driver.
- ✓ Lowest occupancy route.
- ✓ Highest fuel cost vehicle.
- ✓ Branch with highest revenue.
- ✓ Best and worst performing branch.

SUMMARY:

- ✓ The system will show multi-dimensional filtering, operational kpi reporting, profitability analysis, fleet management reporting, branch analysis and transportation analytics.
